Coastal Banksia

Banksia integrifolia

Description

The Coastal Banksia is a fast growing compact Australian Native tree which grows to a height of approximately 5-10 metres.

The leaves are dark green and silvery white beneath are 100-150 mm long and 20-30 mm wide.

The flower spikes 75-150 mm long 60-80 mm in diameter are greenish yellow in colour.

The Coastal Banksia will grow well in coastal areas. It is drought and frost tolerant and is ideal for ornamental and street tree planting.

This tree is native to the eastern coast of Australia.

Note

These trees can be viewed in Recreation Parade Semaphore Park, Henley Avenue Henley Beach and Granville Street Semaphore Park
