

Local Neighbourhood Our Transforming City

VICTORIA STREET, HENLEY BEACH CONCEPT PLAN

Since May 2026, we've been gathering community feedback and exploring options to improve accessibility, safety and amenity on Victoria Street.

What we heard

Residents told us they would like to see:

- Improved stormwater drainage.
- Safer, more accessible pedestrian connections, particularly on the northern side of the street.
- Better management of existing street trees, including roots affecting footpaths and leaf litter and acorns blocking drains.
- Improvements to address speeding and traffic safety concerns.

What we're proposing

While the project initially focused on drainage and road renewal, community feedback highlighted the need for better pedestrian connections along Victoria Street.

We're proposing:

- Road renewal: Renew the road, kerb and gutter between Military Road and East Terrace to improve road conditions and drainage.
- Improved drainage: Install new stormwater infrastructure to reduce water pooling along the street.
- Future pedestrian connection: Narrow the road to approximately 7.2 metres to make room for a future 1.5-metre-wide footpath on the northern side. The footpath would include permeable paving to help protect tree roots and accessible pedestrian ramps.
- Protecting our trees: The proposed road width would help protect established trees, maintain parking on both sides of the street and encourage lower vehicle speeds.

By making room for the future footpath during road renewal, we can avoid having to remove and rebuild the new kerb and gutter later.

We want to hear from you

Before we progress to detailed design, we'd like your feedback on the proposed concept.

- Do you support the proposed footpath and road adjustments?
- Do you have any other comments or feedback about the proposed design?

Your feedback will help us refine the final design to meet local community needs.

To provide feedback you can:

- Complete an online form at **www.yoursaycharlessturt.com.au/victoriastreet**
- Call us on **8408 1357** to have your feedback taken over the phone.
- Email us at **engagement@charlessturt.sa.gov.au**.

Following consultation, we will provide an update about the project's next steps via Your Say. Follow the page to stay updated.

Consultation closes Sunday 13 December 2026.
