BMX TRACK AT GRANGE RECREATION RESERVE

Jump in to share your thoughts.

Following overwhelming community support, we are proposing to build a new BMX facility at Grange Recreation Reserve.

Similar to Apex Park at West Beach, two zones are proposed:

1. Beginner zone (located near the playground)
2. Intermediate zone (located in the natural depression).

Concept Plan Legend

1. Beginner BMX zone
2. Intermediate BMX zone
3. Playground
4. Existing basketball half court

Help us shape the Grange BMX facility:

- Come to our community drop-in at Grange Recreation Reserve on Saturday, 16 May 2026 drop in anytime between 9 - 11am.
- Complete our online survey on Your Say Charles Sturt.

Consultation closes Wednesday 27 May 2026.

To learn more about the design and complete the survey, visit Your Say Charles Sturt at yoursaycharlessturt.com.au/bmx-grange

Got a question? Contact John Wilkinson, 8408 1203 or jwilkinson@charlessturt.sa.gov.au

Your valuable feedback from our initial consultation in January 2026 has helped progress this exciting BMX facility that we're eager to share with you. We'd love to hear your thoughts on the design and layout of the two zones.

Frequently Asked Questions

How did you decide what type of track to build?

During Stage 1 consultation we received overwhelming community support for a BMX facility with a preference for a mixed ability design that has areas for different skill levels. Similar to Apex Park at West Beach, we propose a 'Beginner Zone' and 'Intermediate Zone'. Two zones will also address concerns raised around safety and separation from the nearby playground.

How will the BMX park be maintained?

Council will undertake regular inspections and maintenance of the BMX facility, and, where possible, in partnership with our BMX site user community. Track materials, construction methods, and maintenance practices will include consideration for drainage and irrigation to prevent erosion or dust issues.

What safety procedures will be in place?

The track will be designed to recognised safety guidelines, such as clear sightlines and separation of

skill level, with signage installed to support safe use. Council manages risks through design, maintenance and signage, but users ride at their own risk.

Is there enough space between different activities?

Yes, the layout will ensure appropriate separation distances for safe and comfortable use.

What about noise or antisocial behaviour?

We recognise that some residents may be concerned about potential noise or antisocial behaviour. The facility will be designed and managed to encourage safe, positive and respectful use. Design features such as good visibility and clear sightlines will support passive surveillance and reduce opportunities for inappropriate behaviour. Use of the BMX facility will be focussed on daylight hours as there are no plans to light the facility.

Will there be parking or access improvements?

Through the Stage 1 consultation process we asked the community how they are most likely to attend the BMX track. Most users are expected to ride to the track, and additional parking is not proposed at this stage.

What about skateboard and scooter users?

Scooter and skateboard users can enjoy the nearby Henley & Grange Memorial Oval skate park, which is better suited to their needs.
